## EXPERIENCE

### Web Production Editor

USC Annenberg Media

Aug. 2026 – Present

Los Angeles, CA

- Built and shipped a custom triple-column React layout on Arc XP Fusion for the redesigned Annenberg Media homepage, integrating structured content feeds and responsive styling
- Redesigned a responsive navigation bar and integrated Queryly-powered search to improve content discovery
- Co-lead Fall 2026 web production, collaborating with designers and project managers to translate requirements into production-ready components and webpages across 2+ feature cycles

### Web Developer

Wise Wish Marine Engineering Training Centre

Jan. 2026 – Present

Remote

- Built and shipped wisewishmetc.com, a bilingual English/Burmese site in React, TypeScript, Vite, and Tailwind CSS with responsive, mobile-first layouts
- Integrated a Google Sheets-backed data source for a rolling 12-month course calendar, enabling non-technical staff to update live availability without code changes or redeployment
- Deployed and maintained the site on Cloudflare Workers with automated builds on merge, managing production releases, custom domain configuration, and DNS

### Web Developer / IT Support (Part-Time)

Dr. Khin Sandra Oo, Inc. & Associates

Dec. 2024 – Present

Yorba Linda, CA

- Develop and maintain the clinic's informational website using Next.js, TypeScript, and Tailwind CSS, building responsive service and FAQ components for patients across desktop and mobile
- Maintain front-desk workstations, staff accounts, and routine software updates and backups across clinic devices

### Undergraduate Research Associate

BEDLab @ University of California, Riverside

Jan. 2023 – Jun. 2025

Riverside, CA

- Conducted independent honors research on generative AI adoption in education under Professor Ye Li, presenting progress and findings to faculty and graduate researchers
- Presented findings at the Undergraduate Research Symposium; received the BCOE Best Virtual Research Presentation Award

## PROJECTS

### Adversarial Game Agent | C++

Jan. 2026 – May 2026

- Built a competitive search agent for a 12x12 strategy game using principal variation search, iterative deepening, Zobrist-hashed transposition tables, late move reductions, and move-ordering heuristics
- Placed 19th of 201 agents in the course-wide tournament (top 10%) under a fixed game-time budget

### Container Ship Load Planner | React, Node.js, Express, JavaScript

Sep. 2024 – Dec. 2024

- Built a full-stack container-ship operations planner with a multi-step React workflow and Express REST API for generating load, unload, and balance sequences under shipping constraints
- Designed REST endpoints for manifest ingestion, load/unload planning, and balance computation, with server-side move generation and action logging consumed by the React client

### Reddit Music Search Engine | Python, PRAW, PyLucene

Apr. 2025 – Jun. 2025

- Built a PRAW data pipeline collecting posts and comments from music communities into structured JSONL datasets for indexing and retrieval
- Implemented a PyLucene search pipeline over titles, post bodies, and comments, reranking results using Lucene relevance, post popularity, and time-decay recency

## EDUCATION

### University of Southern California

M.S. Computer Science

Los Angeles, CA

Aug. 2025 – May 2027

### University of California, Riverside

B.S. Computer Science, Honors, Cum Laude (3.89 GPA)

Riverside, CA

Sep. 2021 – Jun. 2025

## LEADERSHIP

### Vice President, Engineers Without Borders

University of California, Riverside

Sep. 2023 – Jun. 2025

Riverside, CA

- Led 20+ engineers on a multi-quarter fertilizer deposition robot from concept through prototype
- Served as Operations Lead for BearHack, co-hosted by Engineers Without Borders and BMES at UCR; secured \$3K+ in grant funding and managed budget, workshops, prizes, and logistics for 100+ participants

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Python, C++, C, SQL, HTML, CSS

**Frameworks/Libraries:** React, Next.js, Vite, Tailwind CSS, Express.js, Node.js, PySpark

**Tools:** Git, GitHub Actions, Docker, MySQL, Cloudflare, Vercel
