Experience

Web Production Editor Aug. 2026 – Present
USC Annenberg Media *Los Angeles, CA*

- Co-lead a team of 20+ volunteers, organizing UX designers, project managers, and web developers into cross-functional project teams
- Developed a custom three-column homepage layout using React and SCSS in Arc XP Fusion to support column proportions unavailable in the default layouts
- Automated the homepage news ticker using configurable Arc XP story feeds, replacing manual entry of headlines and article URLs
- Built a custom Arc XP Fusion content source integrating Amazon S3 and the Arc Content API to retrieve trending stories for reusable PageBuilder components

Web Developer Jan. 2026 – Present
Wise Wish Marine Engineering Training Centre *Remote*

- Built the training center's first bilingual website using React, TypeScript, and Tailwind CSS, with responsive interfaces
- Built an interactive Google Sheets-backed course calendar with data validation and shared promise caching, allowing staff to update schedules without code changes
- Deployed the website on Cloudflare Workers with automated builds and custom domain and DNS configuration

Undergraduate Research Associate Jan. 2023 – Jun. 2025
BEDLab @ University of California, Riverside *Riverside, CA*

- Designed and conducted a Qualtrics survey of 248 students investigating factors influencing generative AI adoption in higher education
- Analyzed survey data in Python using pandas and NumPy, implementing Bayesian Truth Serum scoring, outlier handling, and visualizations
- Published honors capstone through UC eScholarship and received the BCOE Best Virtual Research Presentation Award

Projects

Adversarial Game Agent | *C++* Jan. 2026 – May 2026

- Developed a C++ adversarial search agent using principal variation search, iterative deepening, Zobrist hashing, and move-ordering heuristics to optimize decisions under a fixed time budget
- Placed 19th of 201 agents (top 10%) in the course-wide tournament

Reddit Music Search Engine | *Python, PRAW, PyLucene* Apr. 2025 – Jun. 2025

- Developed a PRAW crawler that collected 500+ MB of posts and comments across 8 music subreddits, implementing deduplication and batched JSONL storage
- Built a PyLucene search engine with custom result ranking combining text relevance, Reddit post popularity, and time-decay recency

Container Ship Load Planner | *React, Node.js, Express, JavaScript* Sep. 2024 – Dec. 2024

- Developed React interfaces for container-ship operations, implementing manifest uploads, browser state persistence, and navigation across loading, unloading, and balancing workflows
- Collaborated on full-stack debugging of React and Express workflows, resolving manifest synchronization and state-management issues while implementing event logging for container movements and operator actions

Education

University of Southern California Los Angeles, CA
M.S. Computer Science *Aug. 2025 – May 2027*

University of California, Riverside Riverside, CA
B.S. Computer Science, Honors, Cum Laude (3.89 GPA) *Sep. 2021 – Jun. 2025*

Technical Skills

Languages: TypeScript, JavaScript, Python, C++, C, SQL, HTML, CSS
Frameworks/Libraries: React, Next.js, Vite, Tailwind CSS, Express.js, pandas, NumPy, PySpark
Tools/Platforms: Git, GitHub Actions, Docker, Node.js, MySQL, Cloudflare, Vercel

Leadership

Vice President, Engineers Without Borders Sep. 2023 – Jun. 2025
University of California, Riverside *Riverside, CA*

- Led 20+ engineers on a multi-quarter fertilizer deposition robot from concept through prototype
- Served as Operations Lead for BearHack, co-hosted by Engineers Without Borders and BMES at UCR; secured $3K+ in grant funding and managed budget, workshops, prizes, and logistics for 100+ participants
